Solo Wargaming Add-on

Overview

Core Lonelog handles personal-scale play well. The Combat Add-on pushes that further into tactical encounters — individual combatants, initiative rounds, hit points. But its FAQ is explicit: mass battles, vehicle combat, and army-scale action are beyond its scope.

Wargaming sessions break that scope on almost every front. Instead of tracking one character's 12 hit points, you are tracking a unit of twelve soldiers whose morale is cracking under fire. Instead of initiative rounds lasting six seconds, you are logging turns that represent minutes of maneuvering. Instead of a single encounter, you may play out a scenario with objectives, deployment zones, a turn limit, and a campaign consequence riding on the result.

This add-on provides the notation layer that bridges those gaps. It introduces unit-level tags, battle structure blocks, a turn marker distinct from the Combat Add-on's rounds, and a campaign state block for tracking warbands and forces between sessions. The same system works at skirmish scale — ten models in a ruined city quarter — and at lance scale, where a BattleMech's armor grid is the thing being tracked.

When core notation is enough: A single fight that resolves in a few rolls does not need this add-on. Core Lonelog plus the Combat Add-on handles that. Reach for this add-on when you need turn-by-turn unit activation, scenario structure, casualty tracking at the unit level, or campaign progression for warbands and forces.

When not to use: If your wargame session is essentially one tactical encounter between individual named characters, the Combat Add-on alone is sufficient. This add-on is for sessions where the unit — not the individual — is the mechanical atom of play.

What This Add-on Adds

Addition	Purpose	Example in a log
`[Unit:Name\\\|size\\\|stats\\\|status]`	Track a military unit's state through a battle	`[Unit:Ironclad Rifles\\\|×12\\\|Morale 8\\\|Fresh]`
`[Force:Name\\\|commander\\\|strength\\\|objective]`	Optional: record overall force composition and goal	`[Force:Reiklanders\\\|Captain Streng\\\|3 units\\\|Raid]`
`[BATTLE]` / `[/BATTLE]`	Delimit a wargame battle within a session	`[BATTLE] ... [/BATTLE]`
`Tn#` turn markers	Separate unit-scale game turns within a battle	`Tn1`, `Tn2`, `Tn3`
Location armor fields	Track mech/vehicle armor by hit location	`[Unit:Atlas\\\|Armor CT22/RT18/LT18]`
`[CAMPAIGN]` / `[/CAMPAIGN]`	Record warband or force state between sessions	`[CAMPAIGN] ... [/CAMPAIGN]`

No new core symbols. Unit activations use `@(Unit Name)` — the established actor attribution convention. This add-on introduces no additions to `@`, `?`, `d:`, `->`, or `=>`.

Design Principles

Units, not individuals. A unit tag tracks aggregate state — model count, morale, status — not individual wounds. When a unit of twelve soldiers takes casualties, update the count. Individuals matter only when they have names and mechanical distinctions: a named hero, a mech pilot, a warband captain.

Scale to complexity. A two-unit skirmish needs less notation than a six-turn battle with eight units per side. Use only as much structure as the scenario demands. The `[BATTLE]` block is optional for quick engagements; the `[CAMPAIGN]` block is optional if you are playing a one-off.

Campaigns as persistent state. A wargame campaign is a series of battles connected by consequence. The `[CAMPAIGN]` block at the start and end of each session captures what has changed — casualties replaced, heroes advanced, treasure spent — so the next session begins with accurate state, not reconstructed state.

Activation follows action. Unit activations are actions. They use `@(Unit Name)` exactly as the Combat Add-on uses it for enemy actors in personal-scale fights. There is no new activation symbol; the question of *who acts* is the prefix, and the question of *what happens* follows from `d:`, `->`, and `=>` as normal.

Part I: Practical Reference

How a wargame session fits into a log

A wargame session typically contains one or more battles, each with a scenario (objectives, forces, special rules), several turns of activation and resolution, and a post-battle consequence block. The structure maps directly onto Lonelog's existing session and scene framework.

```
## Session 7 — The River Crossing
*Date: 2026-04-05 | Duration: 2h | Scenes:
S1*

[CAMPAIGN]
[Force:Ironclad Company|Colonel Vane|3 units|
Hold the bridge]
[Unit:Rifles|×12|Morale 8|Fresh]
[Unit:Cavalry|×6|Morale 7|Fresh]
[Unit:Artillery|×4|Morale 6|Fresh]
[/CAMPAIGN]

### S1 *Broken bridge, dawn*

[BATTLE]
[Scenario:Hold the Line|Deny bridge 6 turns|
Turn limit 8]
[Unit:Raider Infantry|×15|Morale 6|Fresh|road
approach]
[Unit:Raider Skirmishers|×8|Morale 5|Fresh|
left flank]

Tn1
```

```
@(Raider Skirmishers) Advance through woods
@(Rifles) Hold position, volley fire
d: Shooting 2d6=9 vs TN 7 -> Hit
=> [Unit:Raider Skirmishers|×6|wavering]

Tn2
d: Morale 2d6=11 vs Morale 5 -> Broken
=> [Unit:Raider Skirmishers|×6|broken|
fleeing]

[/BATTLE]
=> Bridge held. Raiders withdrew after two
turns.

[CAMPAIGN]
[Unit:Rifles|×11|Morale 8|Fresh] (one
casualty)
[/CAMPAIGN]
```

The `[CAMPAIGN]` blocks bookend the battle: the opening block establishes entering state, the closing block records what changed.

The building blocks at a glance

Activating a unit — player's force:

```
@ Advance the Rifles to the hedgerow
=> [Unit:Rifles|×12|at hedgerow|Fresh]
```

Activating a unit — opponent's force:

```
@(Raider Cavalry) Charge the Rifles' left
flank
d: Charge 2d6+2=11 vs TN 9 -> Hit
=> [Unit:Rifles|×10|wavering] [Unit:Raider
Cavalry|×5|Engaged]
```

Morale test:

```
d: Morale Rifles 2d6=8 vs Morale 8 -> Steady
```

Casualty update:

```
=> [Unit:Rifles|×10|wavering]
```

Turn with phase annotations:

```
Tn3 Move:
@ Advance Rifles to the mill
@(Raider Infantry) Move to the ford
```

```
Tn3 Shoot:
@ Rifles fire on Raider Infantry
d: Shooting 2d6=7 vs TN 7 -> Partial
=> [Unit:Raider Infantry|×13|Morale 6|Steady]

Tn3 Combat:
@(Raider Infantry) Press the ford crossing
d: Melee 2d6+1=9 vs TN 8 -> Hit
=> [Unit:Rifles|×9|wavering]
```

1. Battle Structure

The `[BATTLE]` block

The `[BATTLE]` block delimits a wargame engagement within a scene. It signals a shift into denser notation: unit tags, turn markers, activation logs. It is optional for quick fights but recommended whenever a battle runs more than two turns or involves more than two units per side.

Format:

```
[BATTLE]
[contents]
[/BATTLE]
```

What goes inside a `[BATTLE]` block:

- Scenario line (objectives, turn limit, special rules)
- Force snapshots: `[Force:]` tags if tracking overall forces
- Unit opening states: all units with their entering status
- Turn sequences: `Tn#` markers, activations, rolls, consequences, tag updates
- Mid-battle state snapshots where useful

Opening snapshot — minimal:

```
[BATTLE]
[Scenario:Raid|Grab the loot|5 turns]
[Unit:Warband×8|Morale 6|Fresh]
[Unit:Defenders×6|Morale 7|Fresh]
```

Opening snapshot — expanded:

```
[BATTLE]
[Scenario:Wyrdstone Hunt|Collect 3+ shards
before opponent|6 turns|Night: -1 to
shooting]
[Force:Reiklanders|Captain Streng|4 units|
Objective]
[Force:Skaven|Assassin (hidden)|3 units|
Objective]

[Unit:Swordsmen|×3|Morale 7|Fresh|deployment
zone A]
[Unit:Marksmen|×2|Morale 7|Fresh|deployment
zone A]
[N:Captain Streng|WS4|Ld8|sword+pistol|Fresh]
[Unit:Skaven Night Runners|×6|Morale 5|Fresh|
deployment zone B]
[Unit:Skaven Clanrats|×4|Morale 4|Fresh|
deployment zone B]
[N:Skaven Assassin|WS5|hidden]
```

When to close a block: At the end of the engagement, when the scenario has resolved (objectives met, one side routed, turn limit reached). Close before writing the post-battle consequence.

Analog format:

```
--- BATTLE ---
[contents]
--- END BATTLE ---
```

`Tn#` turn markers

`Tn#` marks army-scale game turns within a battle. It is explicitly distinct from the Combat Add-on's `Rd#` initiative rounds.

`Rd#` vs `Tn#`:

Marker	Add-on	Scale	Duration
`Rd#`	Combat	Personal (individual initiative)	~6 seconds game-time
`Tn#`	Wargaming	Unit (activation turn)	Minutes to an hour game-time

Both can appear in the same log if a wargame session includes a personal-scale duel (see Cross-Add-on Interactions).

Phase annotations (optional):

Many wargame systems divide turns into phases. Annotate with a suffix when the system makes phase order meaningful:

```
Tn2 Move:
Tn2 Shoot:
Tn2 Combat:
Tn2 Morale:
```

Leave phases unannotated when activation is free-form or the system does not separate phases.

Turn counter example:

```
Tn1
@ Advance Rifles to hedge
@(Raiders) Move up the road

Tn2
@ Rifles fire volley
d: Shooting 2d6=10 vs TN 7 -> Hit
=> [Unit:Raiders|×13|Morale 6|Steady]

@(Raiders) Return fire
d: Shooting 2d6=6 vs TN 8 -> Miss

Tn3
@ Charge the raiders while they reload
d: Charge 2d6+2=12 vs TN 9 -> Hit, +1 attack
```

2. Unit Tracking

The `[Unit:]` tag is the core of this add-on. It records the mechanical state of a military unit — not a named individual, but a group acting as a single mechanical entity.

Format:

```
[Unit:Name|size|stats|position|status]
```

Fields:

- `Name` — unit identifier (regiment name, unit type, or custom label)
- `size` — model count `×N`, or abstract: `full`, `half`, `depleted`
- `stats` — one or more key values separated by `|`: `Morale 7`, `WS3`, `Move 6`
- `position` — optional terrain reference: `at hedge`, `road->ridge`, `C4`
- `status` — current state (see status vocabulary below)

Examples:

```
[Unit:Ironclad Rifles|×12|Morale 8|Fresh]
[Unit:Skeleton Warriors|×8|Morale 4|Fresh|at
bridge]
[Unit:Cavalry Screen|×6|Morale 7|at ridge|
Engaged]
[Unit:Artillery Battery|×4|Morale 6|rear|
Pinned]
```

Status vocabulary

Status	Meaning
`Fresh`	At full effectiveness, no stress
`Steady`	Tested and holding; no mechanical penalty unless system specifies
`Wavering`	Morale threatened; one failed test from breaking
`Broken`	Failed morale; withdrawing or fleeing
`Routed`	Fully fled the field; removed from play
`Rallied`	Recovered from Broken; back in play but may have reduced stats
`Pinned`	Cannot advance; may still shoot
`Engaged`	In melee contact with enemy unit
`Exhausted`	Moved and fought; no further actions this turn

These are defaults. Your system may use different terms — substitute freely, or add system-specific states inline.

Tracking casualties

Update the size field when a unit takes casualties. The previous value is not preserved in the tag (it lives in the log sequence):

```
[Unit:Rifles|×12|Morale 8|Fresh]
opening state

d: Enemy volley 2d6=8 vs TN 7 -> Hit
=> [Unit:Rifles|×10|Morale 8|Steady]      two
casualties
```

For significant losses that affect morale:

```
=> [Unit:Rifles|×8|wavering]
d: Morale 2d6=9 vs Morale 8 -> Steady
=> [Unit:Rifles|×8|Steady]
```

Abstract size (when counting individual models is not the point):

```
[Unit:Orc Mob|full|Morale 5|Fresh]
=> [Unit:Orc Mob|half|wavering]
=> [Unit:Orc Mob|depleted|broken]
```

Formation states

Systems that track unit formation add it as a status or stat field:

```
[Unit:Pikes|×16|Morale 7|Line|Fresh]
[Unit:Muskets|×12|Morale 6|Column|Marching]
```

```
@ Form square against cavalry
=> [Unit:Muskets|×12|Morale 6|Square|Fresh]
```

Common formation labels: `Line`, `Column`, `Square`, `Skirmish`, `Wedge`, `Dispersed`.

The `[Force:]` tag

`[Force:]` is optional. Use it when you want to record the overall composition and objective of a named force — especially in campaigns where force identity persists across sessions.

Format:

```
[Force:Name|commander|strength|objective]
```

Fields:

- `Name` — force or army name
- `commander` — named leader, if any
- `strength` — number of units, or abstract: `full`, `reduced`
- `objective` — what this force is trying to accomplish in this battle

Examples:

```
[Force:Ironclad Company|Colonel Vane|3 units|
Hold the bridge]
[Force:Jade Falcon Scout Lance|Mechwarrior
Roshak|4 mechs|Intercept]
```

Leave `[Force:]` out entirely for one-off scenarios with no campaign context.

3. Scenario Setup

Scenarios give battles their stakes and structure: objectives, turn limits, deployment conditions, and special rules. Record these at the opening of the `[BATTLE]` block.

Format:

```
[Scenario:Name|objective|turn limit|special
rules]
```

Fields:

- `Name` — scenario title or identifier
- `objective` — victory condition
- `turn limit` — number of turns, if applicable
- `special rules` — weather, night, terrain effects, or other modifiers (optional)

Examples — minimal:

```
[Scenario:Breakthrough|Exit 2+ units south|10
turns]
[Scenario:Wyrdstone Hunt|Collect 3 shards|6
turns]
[Scenario:Last Stand|Survive 5 turns|5 turns]
```

Examples — expanded:

```
[Scenario:Raid on the Mill
  | Destroy the mill (requires 1 turn
adjacent) OR steal 2+ supply crates
```

```
  | 7 turns
  | Night fight: shooting -1 TN beyond 12"
  | Reinforcements: defender roll d6 each
turn, arrive on 6+
]
```

Recording victory and defeat:

The scenario outcome goes in the `=>` line after `[/BATTLE]`:

```
[/BATTLE]
=> Victory: 2 shards collected, warband
withdrew intact.
=> [Thread:Campaign for the Merchant Quarter|
Advantage: Reiklanders]
```

4. Campaign Tracking

A wargame campaign is the story that connects battles. Between sessions, warbands grow (or shrink), heroes advance (or suffer lasting injuries), and forces repair, reinforce, or consolidate. The `[CAMPAIGN]` block captures this state.

The `[CAMPAIGN]` block

Use `[CAMPAIGN]` blocks at session boundaries — once at the start of a session to establish entering state, and once at the end to record what changed.

Format:

```
[CAMPAIGN]
[contents]
[/CAMPAIGN]
```

What goes inside:

- `[Force:]` tags for named forces
- `[Unit:]` tags for units with experience or persistent state
- `[N:]` or `[PC:]` tags for named heroes, leaders, or pilots
- `[Wealth:]` for treasury (delegates to Resource Tracking Add-on)
- Post-battle rolls and their results (injury tables, experience gains, reinforcement rolls)

Analog format:

```
--- CAMPAIGN ---
[contents]
--- END CAMPAIGN ---
```

Warband progression (skirmish scale)

For games like Mordheim, Frostgrave, or Rangers of Shadow Deep, the warband is the persistent entity. Named heroes are `[N:]` or `[PC:]` tags; unnamed units are `[Unit:]` tags.

Entering state at session start:

```
[CAMPAIGN]
[Force:Reiklanders|Captain Streng|5 units|
Active]
[N:Captain Streng|sword+pistol|WS4|Ld8|6 XP|
Fresh]
[N:Champion Aldric|halberd|WS3|Ld7|3 XP|
Fresh]
[Unit:Swordsmen|×3|Exp 0|Fresh]
[Unit:Marksmen|×2|Exp 2|Marksman skill]
[Wealth:Gold 50gc]
[/CAMPAIGN]
```

Post-battle update:

```
[CAMPAIGN]
d: Injury Streng 1d6=3 -> Leg Wound (−1 Move
next battle)
[N:Captain Streng|Leg Wound|7 XP]
[N:Champion Aldric|4 XP]
```

```
d: XP advance Aldric 1d6=5 -> New skill: Step
Aside
[N:Champion Aldric|Step Aside skill|4 XP]
d: Income 1d6+2=7 -> 7gc found
[Wealth:Gold 50gc+7gc] => [Wealth:Gold 57gc]
[Thread:The Haunted Quarter|Open] (Aldric
spotted something in the ruins)
[/CAMPAIGN]
```

Permanent injuries use the `[N:]` tag's free fields:

```
[N:Captain Streng|Old Battle Wound|-1 WS|8
XP]
[N:Sergeant Voss|Lost Eye|Shooting -1|2 XP]
```

Hired swords and specialists use `[Unit:]` with a count of `×1`:

```
[Unit:Dwarf Troll Slayer|×1|Exp 3|Fearless|
Fresh]
```

Force progression (larger scale)

For campaign wargames at company scale or above, units accumulate experience, take losses, and require reinforcement or repair.

Opening state:

```

```

```
[CAMPAIGN]
[Force:Wolf's Dragoons Alpha Lance|Major
Natasha|4 mechs|Full strength]
[Unit:Atlas AS7-D|Pilot: Natasha|Armor CT30/
RT25/LT25|Heat 0|Fresh]
[Unit:Marauder MAD-3R|Pilot: Kell|Armor CT22/
RT18/LT18|Heat 0|Fresh]
[Unit:Wolverine WVR-6R|Pilot: Torres|Armor
CT16/RT14/LT14|Heat 0|Fresh]
[Unit:Jenner JR7-D|Pilot: Minh|Armor CT10/
RT8/LT8|Heat 0|Fresh]
[/CAMPAIGN]
```

Post-battle repair and status:

```
[CAMPAIGN]
[Unit:Atlas AS7-D|Armor CT8/RT25|needs
repair: CT armor]
d: Repair time 1d6 days=3 -> Atlas
operational in 3 days
[Unit:Marauder MAD-3R|Armor CT22/RT18|Fresh]
[Unit:Wolverine WVR-6R|Armor CT16/RT6|needs
repair: RT armor]
[Unit:Jenner JR7-D|Pilot: Minh|ejected|mech
salvageable]
d: Pilot injury 1d6=2 -> Bruised: Minh out 2
days
[N:Minh|bruised|out 2 days]
[/CAMPAIGN]
```

5. Vehicles and Mechs

Vehicle and mech systems track armor, damage, and in many systems heat — none of which map cleanly to a hit point count. This section adapts the `[Unit:]` tag for that purpose.

Location-based armor

For systems that track armor by hit location (Battletech, many historical naval games), use the `[Unit:]` tag with a dedicated `Armor` field listing locations in order:

Battletech location abbreviations:

Code	Location
`CT`	Center Torso
`RT`	Right Torso
`LT`	Left Torso
`RA`	Right Arm
`LA`	Left Arm
`RL`	Right Leg
`LL`	Left Leg
`HD`	Head

Format:

```
[Unit:Name|Armor CT#/RT#/LT#/RA#/LA#/RL#/LL#|
Heat 0|status]
```

Examples:

```
[Unit:Atlas AS7-D|Armor CT30/RT25/LT25/RA20/
LA20/RL28/LL28|Heat 0|Fresh]
[Unit:Summoner Prime|Armor CT22/RT18/LT18/
RA16/LA16/RL20/LL20|Heat 0|Fresh]
[Unit:Jenner JR7-D|Armor CT10/RT8/LT8/RA4/
LA4/RL10/LL10|Heat 0|Fresh]
```

You do not need to list all locations if your session only tracks a subset. List what matters for your system.

Damage notation

Record armor reduction inline during the battle sequence. The shorthand → shows the change:

```
d: AC/20 fires at Summoner CT, 2d10=14 damage
-> CT hit
=> [Unit:Summoner|Armor CT22->8/RT18/LT18|
Heat 0|Steady]
```

Or if internal structure is breached:

```
d: PPC×2 fires at Kit Fox CT+LT, 2×10=20
damage -> CT destroyed
=> [Unit:Kit Fox A-1|Armor CT0/LT0|destroyed]
=> Pilot ejects
```

Heat tracking

Heat is a stat field on the `[Unit:]` tag, updated each turn:

```
[Unit:Atlas AS7-D|Armor CT30/RT25|Heat 0|
Fresh]

Tn1 Shoot:
@ Atlas fires AC/20 at Summoner
=> [Unit:Atlas|Heat 3]  (3 heat generated)

Tn1 Heat:
@ Atlas dissipates 10 heat -> Heat 3-10 ->
Heat 0
=> [Unit:Atlas|Heat 0]

Tn2 Shoot:
@ Atlas fires AC/20 again; Summoner fires ER
PPC
=> [Unit:Atlas|Heat 3]
@(Summoner) ER PPC return fire
=> [Unit:Summoner|Heat 5]  (accumulated)
```

Heat status thresholds (Battletech standard — adapt to your system):

```
Heat 0–9    Safe
Heat 10–13  Overheat: -1 movement, -1 attack
Heat 14–17  Danger: risk of ammo explosion,
shutdown check
Heat 18+    Critical: auto-shutdown check
each turn
```

Record threshold effects as status annotations:

```
```

```
=> [Unit:Summoner|Heat 18|shutdown risk]
d: Shutdown check 1d6=2 -> Shutdown
=> [Unit:Summoner|Heat 18|shutdown]
```

Simplified vehicle tracking

For systems without location-based armor, use a single `Armor N` field:

```
[Unit:War Wagon|Armor 12|Move 4|Fresh]
d: Ballista fires at war wagon, 2d6=8 -> Hit,
damage 1d6=4
=> [Unit:War Wagon|Armor 12->8|Steady]
```

Or use an abstract damage track:

```
[Unit:Tank|Intact|Morale N/A|Fresh]
=> [Unit:Tank|Damaged|Move -2]
=> [Unit:Tank|Critical|movement halved,
weapon offline]
=> [Unit:Tank|destroyed]
```

Cross-Add-on Interactions

This add-on is standalone, but it works naturally alongside three other add-ons.

With the Combat Add-on

Some wargames include personal-scale duels within a unit-scale battle — Mordheim heroes breaking away from their warbands to fight a named opponent, or a Battletech pilot ejecting and continuing the fight on foot. In those cases, use both add-ons in the same session.

Key distinction: `Tn#` markers for unit-scale turns, `Rd#` markers for personal-scale rounds. Both can appear in the same log.

Situation	Use
Unit activation, morale, casualties	Wargaming Add-on (`Tn#`, `[Unit:]`)
Named hero's personal duel	Combat Add-on (`Rd#`, `[F:]`)

Combined example — Mordheim duel within a battle:

```
[BATTLE]
[Scenario:Wyrdstone Hunt|Collect 3 shards|6
turns]
[Unit:Swordsmen|×3|Morale 7|Fresh]
[N:Captain Streng|WS4|Ld8|sword+pistol|Fresh]
[Unit:Skaven Night Runners|×6|Morale 5|Fresh]
[N:Skaven Assassin|WS5|hidden]
```

```
Tn1
@ Advance Swordsmen to center ruins
@(Night Runners) Move toward objective marker

Tn2
@(Skaven Assassin) Reveals and charges Streng
— personal combat begins
[COMBAT]
[F:Skaven Assassin|WS5|Str4|2 attacks]

Rd1
@ Streng parries, counterattack
d: WS4 vs WS5 2d6=8 -> Hit
d: Wound Str3 vs T3 1d6=5 -> Wound
=> [F:Skaven Assassin|HP-1|wounded]

@(Skaven Assassin) Two attacks
d: WS5 vs WS4 2d6=7 -> 1 hit
d: Wound Str4 vs T4 1d6=3 -> No wound

Rd2
@ Press the advantage
d: WS4 vs WS5 2d6=10 -> Hit
=> [F:Skaven Assassin|knocked down]
[/COMBAT]
=> [N:Skaven Assassin|fled]

Tn3
@ Swordsmen charge the Night Runners
d: Charge 2d6+1=9 vs TN 7 -> Hit
=> [Unit:Night Runners|×4|wavering]
```

With the Resource Tracking Add-on

Use the Resource Tracking Add-on for treasury, supplies, and ammunition — anything that flows in and out across sessions.

Wargaming element	Resource Add-on tag
Warband treasury	`[Wealth:Gold 45gc]`
Campaign supplies	`[Inv:Rations|8]`
Ammo for special weapons	`[Inv:Blackpowder|3]`
Repair parts (Battletech)	`[Inv:CT Armor Pack|2]`

With the Dungeon Crawling Add-on

For dungeon-scenario wargames (Frostgrave vault delves, dungeon scenario maps), the Dungeon Crawling Add-on's `[R:]` room tags and exploration notation work naturally inside a `[BATTLE]` block:

```
[BATTLE]
[Scenario:The Vault|Reach the chest|5 turns|
Unknown rooms]

[R:1|entrance|torchlit|exits: N, E]
[Unit:Warband|×6|Morale 6|Fresh|R:1]

Tn1
@ Move through east passage
d: Explore 1d6=4 -> Room 2 revealed
[R:2|collapsed hall|dark|exits: E, S|Trap:
pitfall]
```

System Adaptations

Mordheim

Mordheim uses a small warband (~10–15 models) in skirmish scenarios through a ruined city. Heroes are individually tracked; units are small groups (2–5 identical warriors). The campaign is the main draw: every battle's outcome affects the warband through injury tables, experience advances, and income rolls.

Key mappings:

Mordheim concept	Lonelog notation
Hero	`[N:Name|WS|BS|S|T|W|I|A|Ld|skills|XP]`
Henchman group	`[Unit:Name|×N|Exp N|status]`
Warband	`[Force:Name|leader|count|treasury state]`
Scenario	`[Scenario:Name|objective|turns|special rules]`
Injury table	`d:` roll, result in `[N:]` tag
Income	`d:` roll, result in `[Wealth:]` update
XP advance	`d:` roll, result in `[N:]` skill field

Example — full Mordheim session:

```
[CAMPAIGN]
[Force:Reiklanders|Captain Streng|5 units|16
XP warband]
[N:Captain Streng|WS4|BS3|S3|T3|W1|I4|A2|Ld8|
```

```
6 XP|Fresh]
[N:Champion Aldric|WS3|BS3|S3|T3|W1|I3|A1|
Ld7|Step Aside|4 XP|Fresh]
[Unit:Swordsmen|×3|Exp 0|Fresh]
[Unit:Marksmen|×2|Exp 2|Marksman skill|Fresh]
[Unit:Dwarf Slayer|×1|Exp 3|Fearless|Fresh]
[Wealth:Gold 57gc]
[/CAMPAIGN]

### S1 *The Merchant Quarter — wyrdstone
hunt*

[BATTLE]
[Scenario:Wyrdstone Hunt|Collect 3 shards
before opponent|6 turns|Dusk: shooting range
–6"]
[Force:Skaven|Grey Seer (hidden)|3 units]
[Unit:Night Runners|×6|Morale 5|Fresh|east
deployment]
[Unit:Clanrats|×4|Morale 4|Fresh|east
deployment]
[N:Skaven Grey Seer|WS3|magic|hidden]

Tn1
@ Advance Swordsmen to center ruins
@(Aldric) Move to cover the left alley
@(Night Runners) Advance through rubble
=> [Unit:Night Runners|×6|at rubble]

Tn2
@ Marksmen fire on Night Runners
d: Shooting BS3 2d6=7 vs TN 7 -> Hit
=> [Unit:Night Runners|×5|Morale 5|Steady]
```

```
@ Streng moves to search first wyrdstone
marker
d: Search 1d6=5 -> Shard found
=> Shard 1/3 collected.

@(Grey Seer) Reveals and casts Warp Lightning
at Streng
d: Magic 2d6=9 vs TN 7 -> Success, Str5 hit
d: Wound S5 vs T3 1d6=6 -> Wound, Streng
knocked down
=> [N:Captain Streng|knocked down|HP-1]

Tn3
@ Streng recovers, charges Grey Seer
d: WS4 vs WS3 2d6=8 -> Hit
d: Wound S3 vs T3 1d6=4 -> Wound
=> [N:Grey Seer|wounded|fleeing]

@ Aldric charges Night Runners with Swordsmen
d: WS3 vs WS3 2d6=10 -> Hit, 2 kills
=> [Unit:Night Runners|×3|wavering]

d: Morale 1d6=5 vs Ld 5 -> Broken
=> [Unit:Night Runners|×3|broken|fleeing]

Tn4-6
@ Collect remaining shards, hold position
d: Search ×2 1d6=4, 1d6=6 -> 1 more shard
found
=> Shards 2/3 collected. Clanrats withdrew.

[/BATTLE]
=> Scenario: Draw. Only 2 shards vs 3 needed.
Skaven fled but completed their objective.
```

```
[CAMPAIGN]
d: Injury Streng 1d6=2 -> Chest Wound (-1
Toughness next battle)
[N:Captain Streng|Chest Wound|-1T next
battle|7 XP]
[N:Champion Aldric|5 XP]
d: XP advance Swordsmen 2d6=7 -> +1 to hit
[Unit:Swordsmen|×3|Exp 1|+1 to hit]
d: Income 2d6=8 -> 8gc + 2 shards (sell for
15gc each)
[Wealth:Gold 57gc+38gc] => [Wealth:Gold 95gc]
[Thread:The Merchant Quarter|Skaven also
hunting here|Open]
[/CAMPAIGN]
```

Battletech

Battletech tracks individual mechs, each with location-based armor, internal structure, heat, and a pilot. Battles are typically at lance scale (4 mechs), with turns divided into Movement, Weapons, and Heat phases.

Key mappings:

Battletech concept	Lonelog notation
Mech	`[Unit:Name|Armor CT#/.../LL#|Heat 0|status]`
Pilot	`[N:Name|Piloting #|Gunnery #|status]`
Lance	`[Force:Name|commander|4 mechs|mission]`
Initiative	`d: Initiative 2d6=N vs 2d6=N -> winner`
Weapon attack	`d: Gunnery TN=N 2d6=N -> hit/miss, location`
Morale/Pilot check	`d: Piloting TN=N 2d6=N -> success/fail`
Heat phase	Update `Heat N` field after each turn

Example — lance engagement:

```
[CAMPAIGN]
[Force:Alpha Lance|Major Natasha|4 mechs|
Operational]
[Unit:Atlas AS7-D|Pilot: Natasha (G3/P4)|
Armor CT30/RT25/LT25/RA20/LA20/RL28/LL28|Heat
0|Fresh]
[Unit:Marauder MAD-3R|Pilot: Kell (G2/P3)|
```

```
Armor CT22/RT18/LT18/RA16/LA16/RL20/LL20|Heat
0|Fresh]
[Unit:Wolverine WVR-6R|Pilot: Torres (G3/P3)|
Armor CT16/RT14/LT14/RA10/LA10/RL16/LL16|Heat
0|Fresh]
[Unit:Jenner JR7-D|Pilot: Minh (G3/P4)|Armor
CT10/RT8/LT8/RA4/LA4/RL10/LL10|Heat 0|Fresh]
[/CAMPAIGN]

### S1 *Industrial wasteland, Luthien
outskirts*

[BATTLE]
[Scenario:Breakthrough|Exit 2+ mechs off
south edge|12 turns|Heavy rubble terrain: +1
TN movement]
[Force:Jade Falcon Scout Lance|Mechwarrior
Roshak|4 mechs]
[Unit:Summoner Prime|Pilot: Roshak (G2/P2)|
Armor CT22/RT18/LT18/RA16/LA16/RL20/LL20|Heat
0|Fresh]
[Unit:Kit Fox A|×3|Pilot: assorted (G3/P3)|
Armor CT10/RT8/LT8/RA6/LA6/RL12/LL12|Heat 0|
Fresh]

Tn1 Move:
d: Initiative 2d6=9 vs 2d6=6 -> Alpha Lance
moves second (advantage)
@(Summoner) Advance north through rubble
@(Kit Fox ×3) Fan out, east flank screening
formation
@ Atlas advances north, uses rubble for cover
@ Wolverine and Jenner sprint south along
road
```

```
Tn1 Shoot:
@ Atlas fires AC/20 at Summoner
d: Gunnery TN7 (range+movement) 2d6=9 -> Hit
d: Location 2d6=7 -> CT, damage 20
=> [Unit:Summoner|Armor CT22->2/RT18/LT18|
Heat 0|Steady]

@(Summoner) ER PPC at Atlas
d: Gunnery TN6 2d6=5 -> Miss

@ Marauder fires PPC×2 at Kit Fox A-1
d: Gunnery TN5 2d6=7 -> Hit
d: Location 2d6=CT+LT -> CT 10->0 destroyed,
internal structure gone
=> [Unit:Kit Fox A-1|Armor CT0|destroyed]
=> Pilot ejects, Minh moves to cover

@(Kit Fox A-2, A-3) LRM 10 at Marauder
d: Gunnery TN5 2d6=8, 2d6=6 -> 1 hit, 1 miss
d: Location 2d6=RT, 6 missiles connect -> RT
18->12
=> [Unit:Marauder|Armor CT22/RT12/LT18|Heat
0|Steady]

Tn1 Heat:
@ Atlas: 3 heat (AC/20) – dissipate 10 ->
Heat 0
@(Summoner): 15 heat (ER PPC) – dissipate 10
-> Heat 5
=> [Unit:Summoner|Heat 5]

Tn2 Move:
@ Wolverine exits south edge — breakthrough
```

```
objective 1/2
@ Jenner exits south edge — breakthrough
objective 2/2

[/BATTLE]
=> Breakthrough achieved. Wolverine and
Jenner escaped. Atlas and Marauder provide
cover; mission success.

[CAMPAIGN]
[Unit:Atlas AS7-D|Armor CT30/RT25|Heat 0|
Intact]
[Unit:Marauder MAD-3R|Armor CT22/RT12|needs
repair RT armor]
[Unit:Wolverine WVR-6R|Armor CT16/RT14|
Intact]
[Unit:Kit Fox A-1|destroyed, salvageable]
d: Repair Marauder RT 1d6 days=2 -> back in 2
days
[Thread:Operation Luthien|2/4 breakthroughs
complete|Open]
[/CAMPAIGN]
```

Generic Fantasy Skirmish (Frostgrave / Rangers of Shadow Deep)

Fantasy skirmish games typically use small warbands (5–10 models), scenario objectives, and light campaign rules. The wargaming add-on handles these with minimal notation.

```
[CAMPAIGN]
[Force:Sigilist Warband|Sigilist Caldris|6
figures|Level 4]
[N:Caldris|Sigilist|Lv4|Will 14|HP 14|Fresh]
[N:Apprentice Voss|Apprentice|Lv1|Will 11|HP
10|Fresh]
[Unit:Infantryman|×2|Exp 0|Fresh]
[Unit:Thug|×2|Exp 0|Fresh]
[Wealth:Gold 200gc]
[/CAMPAIGN]

### S3 *Frozen ruins, midwinter*

[BATTLE]
[Scenario:The Library|Find and retrieve 4
treasure tokens|unlimited turns|Snow: -1
Move]
[Unit:Rival Warband|×6|Morale 6|Fresh|north
edge]

Tn1
@ Caldris moves toward central treasure,
casts Leap on Voss
d: Spellcasting Will 14 TN 12 2d6=14 ->
Success
=> [N:Voss|leaps to east treasure token]
```

```
@ Voss picks up treasure
d: None needed -> Token secured

@(Rival Infantryman) Charges Thug A
d: Fight 2d6+1=9 vs 2d6+2=7 -> Thug wins
=> [Unit:Rival Infantryman ×1|stunned]

Tn2
@ Caldris casts Elemental Bolt at Rival
Apprentice
d: Spellcasting Will 14 TN 14 2d6=11 -> Fail,
−1 HP
=> [N:Caldris|HP 13]

@ Infantry advance toward second token

[/BATTLE]
=> 2 tokens secured, warband withdrew safely.

[CAMPAIGN]
[N:Caldris|Lv4|HP 14|80 XP -> Lv5]
d: Level advance 1d20=14 -> +1 Fight
[N:Caldris|Lv5|Fight +1|80 XP]
d: Injury Thug A 1d20=7 -> Minor wound,
misses next game
[Unit:Thug A|×1|injured|out next session]
d: Treasure 2 tokens -> 150gc + scroll (Push)
[Wealth:Gold 200gc+150gc] => [Wealth:Gold
350gc]
[Inv:Scroll of Push|×1]
[/CAMPAIGN]
```

Best Practices

Do: Use `[BATTLE]` for any multi-turn engagement

```
✓ [BATTLE]
  [Scenario:Raid|Escape with the chest|5
turns]
  [Unit:Warband|×8|Morale 6|Fresh]
  Tn1 ...
  [/BATTLE]
```

Don't: Open a battle block for a single-roll resolution

```
✗ [BATTLE]
  [Scenario:Bar fight]
  Rd1
  @ Hit them -> d: 2d6=9 -> Win
  [/BATTLE]
```

```
✓ @ Brawl with the guards
  d: 2d6+2=9 vs TN 7 -> Win
  => We're clear.
```

Do: Update unit tags inline as state changes

```
✓ d: Shooting 2d6=8 vs TN 7 -> Hit
  => [Unit:Raiders|×10|wavering]
  d: Morale 2d6=9 vs Morale 6 -> Broken
  => [Unit:Raiders|×10|broken|fleeing]
```

Don't: Track individual model hit points in a unit tag

```
✗ [Unit:Raiders|
Model1:HP3,Model2:HP2,Model3:HP1,Model4:HP3...]
```

```
✓ [Unit:Raiders|×4|half strength|Steady]
```

Do: Use the Combat Add-on for personal-scale duels within a battle

```
✓ Tn3 — Captain breaks away to duel the enemy
champion
  [COMBAT]
  [F:Enemy Champion|HP 8|Close]
  Rd1
  @ Strike the champion
  d: d20+5=18 vs AC 14 -> Hit
  ...
  [/COMBAT]
```

Don't: Use `Rd#` for unit-scale turns

```
✗ Rd1
  @(Infantry) Advance to ford
```

```
✓ Tn1
  @(Infantry) Advance to ford
```

Do: Delegate financial tracking to the Resource Tracking Add-on

```
✓ [Wealth:Gold 50gc]
  d: Income 2d6=9 -> 9gc
  [Wealth:Gold 50gc+9gc] => [Wealth:Gold
59gc]
```

Don't: Invent a new wealth tag when one already exists

```
✗ [Treasury:50gc]
```

Do: Use `[CAMPAIGN]` blocks at session boundaries

```
✓ [CAMPAIGN]
  [Force:Warband|state before battle]
  [/CAMPAIGN]

  [BATTLE] ... [/BATTLE]

  [CAMPAIGN]
  [Force:Warband|state after battle]
  [/CAMPAIGN]
```

Don't: Skip campaign state tracking and reconstruct it from memory next session

Quick Reference

New Tags

Tag	Purpose	Example
`[Unit:Name|size|stats|status]`	Military unit state	`[Unit:Rifles|×12|Morale 8|Fresh]`
`[#Unit:Name]`	Reference to established unit	`[#Unit:Rifles]`
`[Force:Name|commander|strength|objective]`	Overall force summary (optional)	`[Force:Alpha Lance|Natasha|4 mechs|Breakthrough]`

`[Unit:]` Fields

Field	Format	Example
Size (count)	`×N`	`×12`
Size (abstract)	`full` / `half` / `depleted`	`half`
Morale	`Morale N`	`Morale 7`
Armor (single)	`Armor N`	`Armor 14`
Armor (locations)	`Armor CT#/RT#/LT#/...`	`Armor CT22/RT18/LT18`
Heat (Battletech)	`Heat N`	`Heat 5`
Experience	`Exp N`	`Exp 3`
Position	Named terrain or grid	`at hedge` / `C4`

Field	Format	Example
Formation	Label	`Line` / `Square` / `Column`
Status	See vocabulary	`Fresh` / `Broken`

Unit Status Vocabulary

Status	Meaning
`Fresh`	Full effectiveness
`Steady`	Tested and holding
`Wavering`	One failed test from breaking
`Broken`	Failed morale, withdrawing
`Routed`	Fled the field
`Rallied`	Recovered from broken
`Pinned`	Cannot advance
`Engaged`	In melee contact
`Exhausted`	No further actions this turn

Structural Blocks

Block	Opens when	Closes when
`[BATTLE]`	Battle begins	Scenario resolves
`[CAMPAIGN]`	At session start or end	After state is recorded

Analog equivalents: `--- BATTLE ---` / `--- END BATTLE ---`, `--- CAMPAIGN ---` / `--- END CAMPAIGN ---`

Turn Markers

Marker	Add-on	Scale
Tn#	Wargaming	Unit-scale game turns
Rd#	Combat	Personal-scale initiative rounds

Battletech Location Codes

CT RT LT RA LA RL LL HD

Complete Example

```
[CAMPAIGN]
[Force:Reiklanders|Captain Streng|3 units|
Active]
[N:Captain Streng|WS4|Ld8|6 XP|Fresh]
[Unit:Swordsmen|×3|Exp 0|Fresh]
[Wealth:Gold 50gc]
[/CAMPAIGN]

[BATTLE]
[Scenario:Raid|Steal the idol|5 turns|Night:
-1 shooting]
[Unit:Cultists|×6|Morale 5|Fresh]
[N:Cult Leader|WS4|Ld7|armed|Fresh]

Tn1
@ Streng advances to ruined altar
@(Cultists) Move to intercept
@(Cult Leader) Charges Streng
d: WS4 vs WS4 2d6=9 -> Hit
=> [N:Captain Streng|HP-1]
```

```
Tn2
@ Streng counterattacks
d: WS4 vs WS4 2d6=11 -> Hit, +1 wound
=> [N:Cult Leader|knocked down]
@ Swordsmen charge cultist flank
d: WS3 vs WS3 2d6=8 -> Hit, 2 kills
=> [Unit:Cultists|×4|wavering]
d: Morale 1d6=6 vs Ld 5 -> Broken
=> [Unit:Cultists|×4|broken|fleeing]

[/BATTLE]
=> Victory. Idol secured.

[CAMPAIGN]
d: Injury Streng 1d6=4 -> No lasting effect
[N:Captain Streng|7 XP|Fresh]
d: Income 1d6=5 -> 15gc from the idol
[Wealth:Gold 50gc+15gc] => [Wealth:Gold 65gc]
[/CAMPAIGN]
```

FAQ

Q: When should I use this add-on instead of the Combat Add-on?
A: Use the Combat Add-on for personal-scale fights — one character vs. one or a few named opponents, tracked hit point by hit point, initiative round by round. Use this add-on when the unit is the mechanical atom: when you track model counts rather than individual HP, when turns represent minutes rather than seconds, when scenario objectives drive the action. For games that mix both (Mordheim, warcrawl RPGs), use both add-ons in the same session.

Q: Can I use `Rd#` for my wargame turns instead of `Tn#`?
A: You can, but it creates confusion if you ever mix wargaming notation with the Combat Add-on in the same log. `Rd#` has a specific meaning (personal-scale initiative round) in the established Lonelog ecosystem. `Tn#` reserves a distinct identity for unit-scale game turns.

Q: My system doesn't have morale — do I need status vocabulary?
A: No. Status fields are optional. If your system doesn't track morale or unit condition, simply omit those fields from `[Unit:]` tags. `[Unit:Rifles|×12|Fresh]` is perfectly valid notation.

Q: How do I handle random scenario events — traps triggering, weather changing, reinforcements arriving?
A: Use `d:` for any random determination and `=>` for the consequence. For events that simply occur without a roll, prose or a parenthetical note works fine: `(Reinforcements: Skaven Rat Ogre arrives turn 3)`. Note: a proposed `!` symbol for external/world events is under consideration for a future core notation update, which would make these entries cleaner.

Q: How do I track a large battle with 20+ units per side?
A: Focus your log on the units that matter most — the ones that have consequential moments, pass or fail critical morale tests, or carry the objective. Units that do nothing interesting in a turn don't need an entry. The log is a record of the meaningful, not a transcript of every activation.

Q: How does this work in an analog notebook?
A: Use `--- BATTLE ---` / `--- END BATTLE ---` and `--- CAMPAIGN ---` / `--- END CAMPAIGN ---` instead of the bracket blocks. Tag syntax is identical. Turn markers (`Tn1`, `Tn2`) work as headings or margin notes. For mech armor, a small grid in the margin is faster than writing out all location values.

Q: Can I use this add-on without any campaign tracking?
A: Yes. For a one-off scenario with no campaign consequence, skip `[CAMPAIGN]` blocks entirely and use just `[BATTLE]`, unit tags, and turn markers. The campaign elements are completely optional.

Q: Do I need `[Force:]` tags?
A: Only if force identity is meaningful to you — usually in campaigns where force composition persists or you want to record who commanded what. For single-session battles, just list the units directly without a force wrapper.

Credits & License

© 2026 Roberto Bisceglie

This add-on extends Lonelog by Roberto Bisceglie.

The Solo Wargaming Add-on was prompted by community requests to support Battletech and Mordheim session logging. The Combat Add-on's explicit note that "mass battles, vehicle combat, and chase scenes may warrant their own add-ons" provided the design mandate.
